

Year: 2018

Service: public space, branding, merchandising

After opening several BalMESSENCE boutiques, our company worked on new project of this brand - the SPA salon. The salon was supposed to adopt the same style of the boutiques.

The space of the salon was divided in two for the comfort of the customers. The interior was made in a classic style with the elements of Art Nouveau. The interior is full of light colors. The brand's logo is placed on the wall with decorative elements.

The salon equipment, furniture and lightning were designed individually. As a result, this salon is a place where every person could feel himself/herself truly royal.
